## Manual Mac Enrollment:

1. On your macOS device, open **Safari**.
2. In the address bar in Safari, type enrollmymac.Pfizer.com (http://enrollmymac.pfizer.com/jamfenrollment.html) and hit **enter**.

3. Authenticate to Pfizer through **PingID**.

4. Read and accept the **Pfizer EULA**.

interactions may be monitored).

6. You acknowledge that your device may be audited (including all content, not just Pfizer email, work products or applications.)

7. In the event of an investigation into a potential legal, regulatory, compliance, privacy or security issue, you will surrender your device and access codes for forensic review by Pfizer. You are not permitted to clean or wipe the device before submitting it for forensic review.

8. Your device may be completely wiped of all configurations, applications and data including at but not limited to the following events: (8a.) You leave the service of Pfizer (8b.) The device has not connected to Pfizer's Management System (JAMF) for more than 30 days (8c.) The device is transferred to another individual (8d.) The device is damaged and sent to a non-Pfizer resource for repair (8e.) You exceed the allowable unsuccessful attempts to correctly enter your device password (8f.) The device is lost or stolen.

9. Pfizer is not responsible for the restore, repurchase or recovery of any personal resources that are lost or impacted by the forensic review process, to, such things as contacts, calendars, downloads, apps, photos, music, or movies.

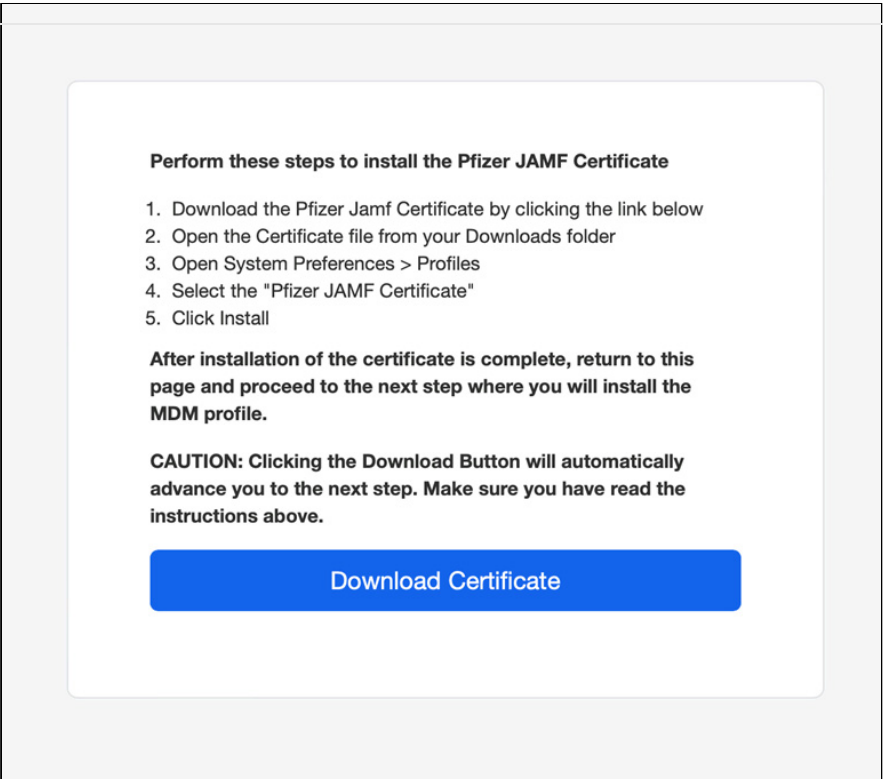

10. You will immediately report, to the local Pfizer Service Desk, the loss or theft of your Mac device or potential unauthorized access to the data on your device.

11. Pfizer reserves the right to patch, without warning, any software installed on Pfizer managed macOS machines, including but not limited to software installed through Pfizer's device management system or software manually installed by the user.

Powered by Jamf

5. Click **Download Pfizer Jamf Certificate**.

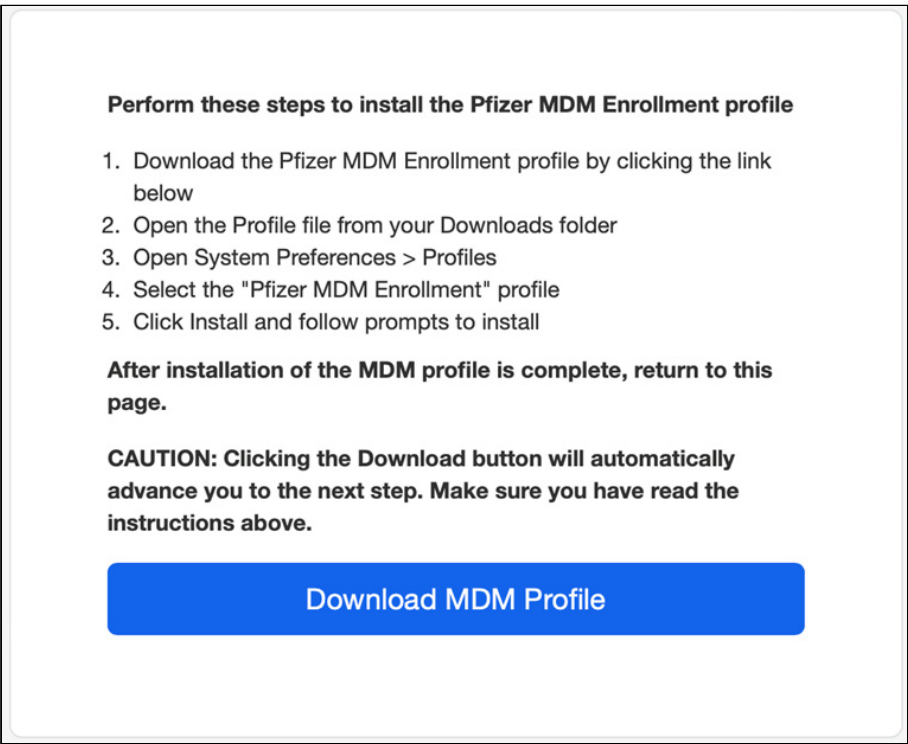

6. Go to **System Settings > General > Device Management**

7. Double click the **Pfizer Jamf Certificate** profile and click **Install**.

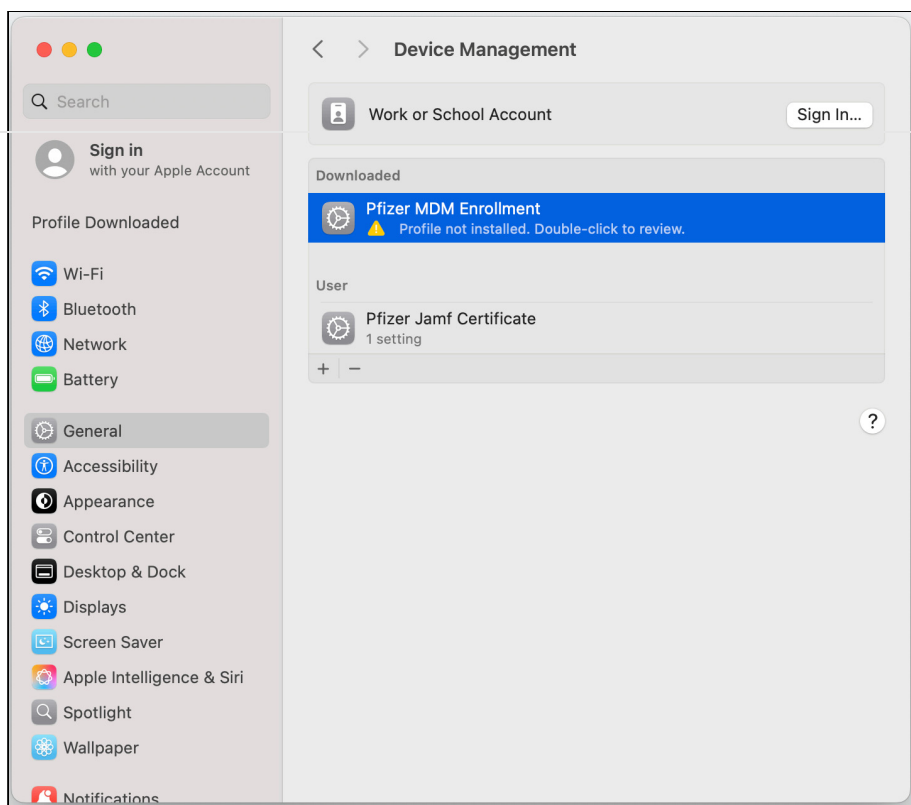

8. The certificate shows **Verified**.

9. Return to the **browser window** and click **Download MDM Profile**.

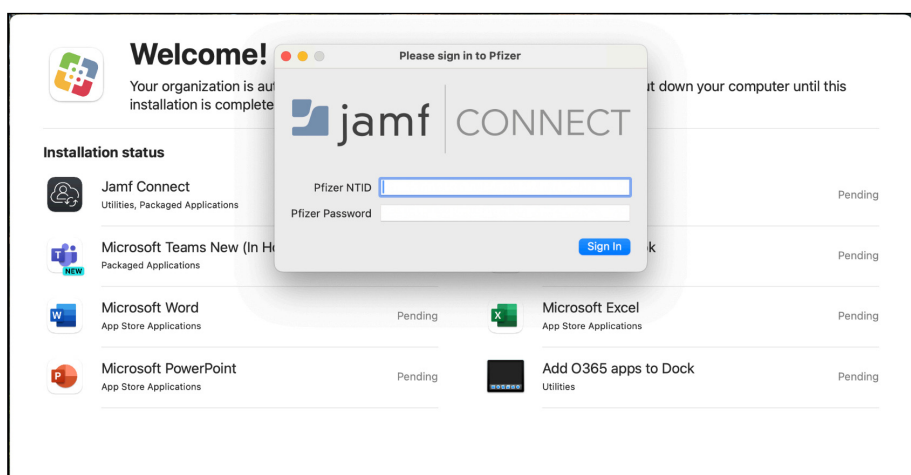

10. Go to **System Settings > General > Device Management**.

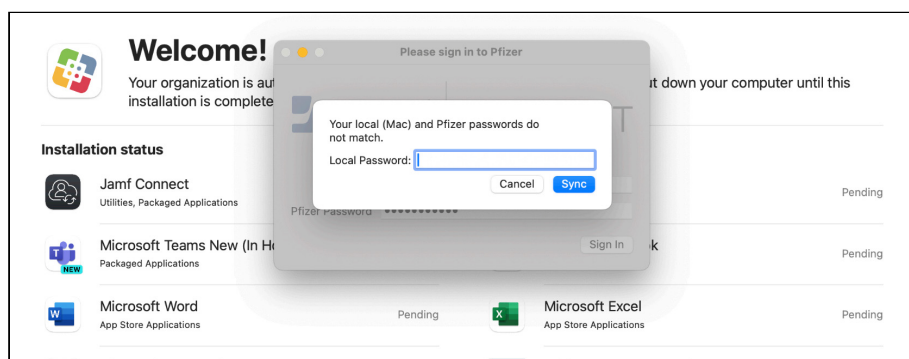

11. Double click **Pfizer MDM Enrollment**, click **Install** and follow the **prompts** to complete enrollment.

12. Finally, after few minutes the enrollment complete message displays "To complete your enrollment, you need to click logout" You may be also prompted to change your password at the next login.
13. After successful password change and login, Launch **Self Service** application to install recommended apps e.g. Jamf Connect, O365 applications.
14. Enter your Pfizer account credentials (**Pfizer Pfizer Network ID & Password**) when prompted by Jamf Connect and select Sign In.

15. Jamf Connect automatically identifies if your local Mac password matches your Pfizer credentials while syncing your passwords.
  - If your local Mac password differs from your Pfizer credentials, enter your local Mac password and click sync.

 **NOTE:** This is the last time your local Mac password is required. After the sync is complete, your login password for your Mac remains the same as your Pfizer account password.

### Good news - your passwords are now synced!

- Your local Mac password is no longer required.
- Use your Pfizer credentials the next time you login to your Mac.

### **CAUTIONS:**

- Upon restarting your MacBook, you are prompted to enter your Pfizer password credentials to log in. If you have multiple profiles on your machine, you may need to click **Connect** to sync your Pfizer credentials to the desired profile.
- If your Pfizer password expires and/or is changed, the JAMF connect tool prompts you to resync your passwords following this same process.
